BEST PRACTICES FOR SOPHISTICATED BUSINESS SOFTWARE DEVELOPMENT

Through working on hundreds of projects worldwide, SoftElegance specializes in sophisticated business software development. After more than 20 years experience in custom software development business, company obtained the valuable expertise for development of high-level software solutions.

SoftElegance has been providing custom business software development services, engineering applications, SaaS systems, and business processes automation solutions for companies, operating in oil and gas, engineering, and manufacturing industries.

DRILLING REPORTING SAAS

More than 10 years ago SoftElegance started to develop Software-as-a-Service solution, the leading oil and gas operations reporting system, on outsourcing business model. Nowadays SoftElegance is responsible for ongoing development, 3rd and 4th level support.

The Drilling Reporting Software offers a full-scale online database that tracks high-level performance from planning, through drilling, to plug and abandonment. This is a powerful business web solution that houses operations information and enables users to run advanced analytical reports. Set of ASP technologies was used since the earliest version till .NET 4.5, and SQL Server 2012 nowadays.

DESIGN & PRINTING SOFTWARE

SoftElegance develops label printing software solutions for the smallest retailer up to the largest chain of stores. Since 1998, previous production versions' support and continuous up-to-date development have been provided.

The Design and Printing Software is designed for high performance, scalability and security. The solution is used across the retail industry and provides a sophisticated toolset, allowing the design of professionally looking graphical signs and bar-code labels. Tens of thousands of end users operate this software at retail stores all over the U.S. on a daily basis.

The core technologies used are .NET Framework 4.5, MVC 4, AngularUI, jqxGrid, MS SQL Server 2012 and Cloud hosting.

The screenshot shows a web application interface with a sidebar on the left containing navigation items like 'Lorem ipsum', 'dolor sit amet', and 'consectetur adipiscing'. The main area features a data grid with columns for 'Index', 'Static Filter', 'Search Primary ID', and various data fields. The grid displays multiple rows of data, including IDs, prices, and status indicators. A top navigation bar includes 'Action', 'Action Setup', and 'Assign Actions'. A bottom navigation bar shows 'Page 1 of 1129' and a pagination control.

Index	Static Filter	Search Primary ID	Search Field#1	Search Field#2	Custom Button#1	Custom Button#2	Total Items 80 000	Selected Items 1
0065041815		0065041815					1.0000	1.0000

© 2011-2013 International ApS Version 1.1.1.1

In 2006 SoftElegance has started its first project to deliver ultimate business processes automation software for an independent Fortune 500 company's department, a leading worldwide equipment and components provider. The solution is used in oil and gas drilling and production operations, oilfield and supply chain integration services.

The following business areas were impacted by SoftElegance custom software solution: sales, production, operations quality, service, shipping, material handling, and robust alerts module.

The reduced time was spent on quality control procedures, inventory tracking and services/shipment planning and tracking, improving efficiency and effectiveness as well as considerably reducing human errors factor in all operations.

BI TOOL

In addition, SoftElegance developed the unique web-based Business Intelligence software that combines all BI features power with flexibility and ease of use. Being integrated with the Microsoft BI platform, it provides end users with the capabilities to design reports and conduct sophisticated ad-hoc data analysis using familiar features of Microsoft Excel worksheets.

CONCLUSION

Together with global software solutions SoftElegance has launched several applications for specific business automation needs. For example, WPF application to be used in the fields for onshore platforms repair, engine and API to handle specific corporate hierarchy, custom BI tool to provide typical reports for oil and gas companies, HSE applications etc.

SoftElegance's core team consists of business analysts and lead software developers with more than 20 years of experience in sophisticated business software development.

Create new SaaS solution or Single-Page Application using latest technologies, private cloud infrastructure, and platforms that unlock the potential of Big Data
